Instructions to the Examiner:

The person requesting this physical examination is an applicant for training or currently participates in diving activities with self-contained underwater breathing apparatus (SCUBA) or other similar equipment. Your opinion of the applicant's medical fitness for diving is requested. The Medical History and Physical Examination forms focus on conditions that may put a diver at increased risk for injuries or other conditions that could lead to decompression sickness (DCS) or drowning. The diver must be able to withstand some degree of cold stress, high pressures of up to six (6) atmospheres, the physiologic effects of immersion, the optical effects of water, and have sufficient physical and mental reserves to deal with underwater emergencies. Final determination for fitness for diving will be made by the NOAA Diving Program.

The Examiner should review pages 2-3, complete fields 88 and 89 on page 3, complete a comprehensive physical examination of the diver, and complete this page and all following pages. All tests and examinations must be completed in the last 12 months (except for the chest X-ray, which should be completed within the last 24 months). The additional tests that must be completed are on page 1 of this form. If you conduct other laboratory tests or diagnostic studies as part of this physical examination, include copies of these results with the submission of the other required documentation. Submission instructions for this form and all test results are on the last page of this form.

For questions, please contact the NOAA Diving Medical Officer at (206) 526-6474.
